1 Executive Summary

A Phase I Environmental Site Assessment (ESA) was conducted for the property located at 13860 El Camino Real, San Diego, California (subject property). The subject property consists of approximately 3.97 acres of land situated on Assessor's Parcel Number 304-650-37-00 (Figure 1, Project Location). The subject property is primarily undeveloped and currently occupied by a former rail car, a mobile home, and three shipping containers. The former rail car is located on the eastern border of the subject property, the mobile home is just north of the rail car, and the shipping containers are north of the mobile home on the eastern border.

The findings of this investigation are based on a review of historical source information, a search of regulatory agency databases, review of available local agency records, interviews, and a site reconnaissance.

Information gathered for this report indicated the following:

- The subject property appears undeveloped from at least 1928 to 1943; the exact date of original site development is unknown. One small building was present on the subject property in 1943, in the southeastern corner; it was removed in 2009. An additional building was observed in the northeastern corner from 1979 to 1985. The current building was brought to the subject property by 2012. Based on an aerial review on Google Earth (Google Earth 2020), the mobile home that is currently on the subject property was brought there in 2018. The ages of these structures currently on the subject property are unknown. If hazardous building materials (e.g., asbestos containing materials, lead based paint) are present in either structure, they would need to be disposed of in accordance with applicable state and local requirements.
- The subject property was used as a residence from approximately 1943 to 2009. A horse park was present on most of the subject property in 2008.
- The subject property was used for agriculture from at least 1949 until approximately 1953 and from 2014 to 2016. Organochlorine pesticides may have been used during the earlier period of agriculture use; however, given the limited time the agriculture was present, that it has been approximately 70 years since then, and that the subject property has been graded, it is unlikely that residual organochlorine pesticides, if present, would be above regulatory screening levels. Adjoining properties have consisted of undeveloped land, agricultural land, residential housing, and roadways. Surrounding properties have also included light commercial use.
- Based on the documents reviewed, site inspection, and visual observation of neighboring properties from
 the subject property and public right-of-way, it is unlikely that adjacent or nearby properties have impacted
 the environmental conditions at the subject property.

Dudek performed this Phase I ESA of the subject property in conformance with the scope and limitations of American Society for Testing and Materials Practice E1527-13. This report summarizes the research and findings of the Phase I ESA. This assessment revealed no evidence of recognized environmental conditions (RECs) in connection with the subject property. This assessment revealed no evidence of historical RECs or controlled RECs in connection with the subject property. Dudek did not identify any vapor encroachment conditions in connection with the subject property.

Dudek identified the following items of potential concern:

The wetland on the eastern portion of the subject property is registered with the U.S. Fish and Wildlife Service
National Wetland Inventory. Appropriate permits would need to be obtained prior to any development of the
subject property.

SOURCE: ESRI

FIGURE 1 **Project Location**

2 Introduction

This Phase I Environmental Site Assessment (ESA) was performed in accordance with the guidelines stipulated in the American Society for Testing and Materials (ASTM) Standard E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. This Phase I ESA was conducted as part of environmental due diligence for the property located at 13860 El Camino Real, San Diego, California (subject property).

2.1 Assessment Procedure and Scope of Investigation

Phase I ESAs assist in identifying past and present land use, including identification of possible releases or disposal of manufacturing or other wastes, if such information is contained within regulatory reports or files and/or is currently visible on site. The assessment reviews local, county, state, and U.S. Environmental Protection Agency lists of known or potentially hazardous waste sites, landfills, and sites currently under investigation for environmental violations that may be of concern to a site.

The scope of this environmental investigation consists of (1) a reconnaissance of the subject property; (2) a search of regulatory agency records; (3) review of available historical aerial photographs, topographic maps, Sanborn fire insurance maps, city directory listings, and building department records; (4) an environmental lien search; (5) interview of the property owner and/or representative; and (6) preparation of this Phase I ESA report detailing the findings of the investigation.

These activities were conducted to identify recognized environmental conditions (RECs). The term "recognized environmental condition" (or RECs) means the presence or likely presence of any hazardous substances or petroleum products on the subject property under conditions that indicate an existing release, a past release, or a material threat of a future release to the environment (e.g., soil, soil vapor, groundwater, or surface water). The term is not intended to include de minimis conditions. De minimis conditions are conditions that generally do not present a material risk of harm to public health or the environment and would not be the subject of an enforcement action if brought to the attention of governmental agencies.

The term "controlled recognized environmental condition" (controlled REC) is an environmental condition that would have been considered a REC in the past, but which has been remediated and received risk-based closure by a regulatory agency (i.e., no further action letter) where residual contamination remains in place. Furthermore, "controlled REC" is used if the property is subject to a control or use restriction (i.e., property use restrictions, activity and use limitations, institutional controls, or engineering controls) due to residual on-site contamination.

The term "historical recognized environmental condition" (historical REC) is an environmental condition that would have been considered a REC in the past, but which has been remediated and received unrestricted residential use closure by the regulatory agency. Therefore, no controls or use restrictions have been applied to the property.

2.2 Qualifications of Environmental Professionals

This Phase I ESA was prepared by Glenna McMahon, environmental engineer, and Xiomara Rosenblatt, geologist. Qualifications for Ms. McMahon and Ms. Rosenblatt are presented in Appendix A.

I, Glenna McMahon, declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in Section 312.10 of 40 Code of Federal Regulations Part 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 Code of Federal Regulations Part 312.

3 Site Location

The subject property consists of 3.94 acres of land located at 13860 El Camino Real in San Diego, California. The subject property (Assessor's Parcel Number [APN] 304-650-37-00) is located on the east side of El Camino Real in San Diego County, California, directly east of the Harvest Evangelical Church, 0.24 miles southwest of Gonzales Canyon, 0.84 miles south of the San Dieguito River, and 0.29 miles west of Rancho El Camino Equestrian (Figure 1, Project Location). The subject property is part of unincorporated San Diego County. The subject property is currently undeveloped; several structures/containers are located on the eastern boarder of the parcel. At the time of this Phase I ESA both the building and the mobile home were unoccupied.

4 Environmental Setting

The subject property is located within the California Batholith on the south side of the San Dieguito River Valley and the west end of Gonzales Canyon. This area is primarily composed of Cenozoic-era Pleistocene Paralic deposits.

General topographic information for the subject property and the surrounding area was obtained from a review of the Del Mar 7.5 × 7.5-minute U.S. Geological Survey topographic map (USGS, 2020), from the Environmental Data Resources (EDR) report (Appendix B), and from a site visit. The topography of the subject property is characterized by an overall north slope, toward the San Dieguito River. The elevation of the subject property ranges from 34 feet above mean sea level to 43 feet above mean sea level.

No subsurface geologic investigations were performed as part of this Phase I ESA. According to the U.S. Department of Agriculture Natural Cooperative Soil Survey, the subject property is underlain by Las Flores fine sandy loam. These soils are generally described as poorly drained, clayey soils with low infiltration rates.

Based on sources searched by EDR, 52 water wells were mapped within 1 mile of the subject property. Of the 52 wells, 9 are located within 0.25 miles of the subject property. The 9 wells are divided into three clusters, wells A1 and A2, B3-B7, and C7-C9. Well clusters B and C are downslope to the north and Well cluster A is to the west of the subject property. Well clusters A and B are managed by the Department of Water Resources and Well cluster C is managed by the U.S. Geological Survey. The reported well depth for one of the wells is 36.6 feet below ground surface; the depth to water is reported as 0.80 feet below ground surface. The most recent measurement was in 1983. There are no details for the other wells.

During the site reconnaissance, one water well was observed in the southeast corner of the subject property; it supplies water to the residences on the subject property.

Based on the Federal Emergency Management Agency Flood Zone Map, the subject property lies within an area depicted as Flood Zone X, Area of Minimal Flood Hazard (FEMA 2020).

The California Geologic Energy Management Division online database was reviewed for wells on or near the subject property (CalGEM 2020). According to this database, which shows known oil and gas wells in the state, no oil, gas, or geothermal wells are/were located on, or within 1 mile of, the subject property.

5 Interviews

5.1 Site Representative Interview

Mr. Harry Krikorian, representative of the owner of the subject property, St. John Garabed Church, responded to a property background questionnaire provided by Dudek (Appendix C). Mr. Krikorian stated that the church has owned the subject property since 2017 and it has been unused during that time; he noted that a construction trailer is on the subject property. He responded that there were no prior industrial uses of the subject property and that he does not know if past uses included dumping, burying, or burning hazardous wastes/materials. Mr. Krikorian stated that hazardous substances have not been stored on the subject property in quantities greater than 5 gallons and there have been no spills of hazardous substances during the time the church has owned the subject property. Mr. Krikorian stated that subject property is served by a private well and a water tank is present; the water tank was installed in approximately 2014. He does not know if a septic tank is located on the subject property. Mr. Krikorian stated that he is not aware of any environmental lawsuits, environmental liens, or land use limitations related to environmental issues.

5.2 User-Provided Information

In accordance with ASTM Standard E 1527-13, to qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the user must provide the following information (if available) to the environmental professional. Dudek sent the following questions to Nolan Weinberg of PMB, and received the following responses on January 12, 2020:

1. **Question:** Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

Response: No.

2. Question: Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

Response: No.

3. **Question**: As the user of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Response: No.

4. **Question**: Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Response: Purchase price is fair market value. PBM is not aware of any contamination present at the property.

5. Question: Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user, (a) do you know the past uses of the property, (b) do you know of specific chemicals that are present or once were present at the property, (c) do you know of spills or other chemical releases that have taken place at the property, (d) or do you know of any environmental cleanups that have taken place at the property?

Response: (a) Vacant land, maybe some agricultural uses. (b)No. (c) No. (d) No.

6. **Question**: As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

Response: No.

5.3 Local Agency Interviews

5.3.1 San Diego County

5.3.1.1 Department of Environmental Health

San Diego Department of Environmental Health is the Certified Unified Program Agency for the subject property. The Certified Unified Program Agency is responsible for implementation of the Unified Program, which includes regulations regarding aboveground storage tanks, accidental release prevention, hazardous material business plans, management and inventory of hazardous materials and hazardous wastes, and underground storage tanks (USTs). Dudek contacted the San Diego Department of Environmental Health to obtain information about spills, tanks, or chemicals used that may have impacted the environmental conditions on the subject property. The San Diego Department of Environmental Health responded on December 11, 2020, stating that is has no records for the subject property (Appendix D).

5.3.1.2 Planning & Development Services

Dudek searched San Diego County Planning & Development Services online database to obtain information available on the subject property (PDS 2020). The online database provides information from Air Pollution Control District; Agriculture, Weights, and Measures; San Diego Department of Environmental Health; Department of Public Works; and Planning & Development Services. The online database did not identify any sites on or within a 1-mile radius of the subject property.

5.3.2 Department of Agriculture, Weights, and Measures

Dudek requested information from the San Diego County Department of Agriculture, Weights, and Measures on December 12, 2020. This request was submitted based on the high groundwater conditions at the subject property and historical agriculture. Agriculture, Weights, and Measures responded on December 16, 2020, stating that it has no records for the subject property (Appendix D).

5.3.3 San Diego Regional Water Quality Control Board

Dudek contacted the San Diego Regional Water Quality Control Board to obtain records of spills, tanks, or other releases that may have impacted the environmental conditions on the subject property. The Regional Water Quality Control Board responded on December 17, 2020, stating it does not have records for the subject property (Appendix D).

Dudek accessed GeoTracker to search online records pertaining to Regional Water Quality Control Board sites (SWRCB 2020). The database did not have record of sites on the subject property or within 1 mile of the subject property.

5.3.4 San Diego Department of Toxic Substance Control

Dudek contacted the San Diego Department of Toxic Substance Control (DTSC) to obtain records of spills, tanks, or chemicals used that may have impacted the environmental conditions on the subject property. DTSC responded in an email dated December 14, 2020, that it does not have records for the subject property (Appendix D).

Dudek accessed EnviroStor to search online records pertaining to DTSC sites (DTSC 2020). The following records were identified within 1 mile of the subject property.

- Chevron and Rancho Car Wash at 2661 Via De La Valle, Del Mar, California 92014 are 0.87 miles to the northwest of the subject property, both registered as Recovered Government Archives leaking UST sites. Site assessment began with the Rancho Car Wash in 1994 when 5 soil borings and 3 groundwater monitoring wells were installed in the vicinity of the USTs. Petroleum hydrocarbon and benzene concentrations were discovered in the groundwater. In April 1997, four 10,000-gallon USTs were removed along with 3500 cubic yards of impacted soil. From 1994 to 2001, 11 monitoring wells were installed; in 2009, the site conceptual model and corrective action plan recommended remediation by natural attenuation with no further monitoring. Based on the first quarterly groundwater monitoring report in 2009, the hydraulic gradient was 0.013 feet per foot to the west-southwest. In 2016, a Shallow Baseline Assessment was conducted at the Chevron station; hydrocarbons were found during the sampling. In 2017, the Department of Environmental Health Site Assessment and Mitigation Program determined that the hydrocarbons found in the 2016 investigation did not represent a new release but were residual hydrocarbons from the original release from Rancho Car Wash site. The Rancho Car Wash case was closed in October 2010 and Chevron closed in 2017. Based on the distance and regulatory database, this site does not appear to have impacted the environmental condition of the subject property.
- U.S. Navy Military Evaluation. Potential for lead contaminants; inactive and needs evaluation as of July 1st, 2005. Additional information is provided in Section 10.2, Adjacent/Nearby Properties.
- Fairbanks/Highland Middle School Site Number 6 was plotted within 1 mile of the subject property; however, after further investigation, the address of the school is approximately 2.75 miles to the southeast of the subject property. Based on the distance and regulatory database, this site does not appear to have impacted the environmental condition of the subject property.

5.3.5 California Environmental Protection Agency

The California Environmental Protection Agency maintains an online database that combines information about environmentally regulated sites and facilities in California (CalEPA 2020). Information includes sites listed in the California Environmental Reporting System, California Department of Toxic Substances Control EnviroStor, State Water Resources Control Board GeoTracker, California Integrated Water Quality System, and Toxic Release

Inventory. The online database had records for the subject property; these are discussed in Section 5.3.4. There were no records for sites within 1 mile of the subject property.

5.3.6 California Department of Pesticide Regulation

The California Department of Pesticide Regulation's California Pesticide Information Portal provides information on pesticide-related issues from multiple data sources. Dudek queried the California Pesticide Information Portal database for pesticide use or documentation for the subject property (CalPIP 2020). The subject property was not identified in the available records from 1990 to 2018.

5.3.7 National Pipeline Mapping System

The National Pipeline Mapping System Public Map Viewer is an online application that maps gas transmission and hazardous liquid pipelines, liquefied natural gas plants, and breakout tanks that are under the regulation of the Department of Transportation Pipeline and Hazardous Material Safety Administration. Dudek accessed this online application on December 11, 2020 (NPMS 2020). The National Pipeline Mapping System map did not show any liquefied natural gas plants, breakout tanks, accidents, or incidents on or within 1 mile of the subject property. However, it did show gas transmission or hazardous liquid pipelines 0.4 miles to the east of the subject property.

5.3.8 Solid Waste Information System

The California Department of Solid Waste Information Portal provides information on solid waste facilities, operations, and disposal sites throughout the State of California. Dudek queried the Solid Waste Information Portal database online on December 11, 2020 (CalRecycle 2020), for landfills, transfer stations, composting sites, invessel digestion sites, engineered municipal solid waste conversion facilities, transformation facilities, and closed disposal sites or documentation for the subject property. The Solid Waste Information Portal did not show data on or within 1 mile of the subject property.

6 Site Reconnaissance

Xiomara Rosenblatt of Dudek conducted a site reconnaissance of the subject property on December 18, 2020. The site reconnaissance consisted of walking transects of the site, recording observations, and taking photographs. Photographs are presented in Appendix E; key site features are shown on Figure 2, Subject Property.

The subject property can be accessed from the north via a dirt road off of El Camino Real (Photograph 1). The dirt roadway passes through an active construction site. The subject property appears to have been recently graded and grubbed, with tall grasses and the top layer of soil being removed and piled in the center of the parcel (Photograph 2). The topography slopes from the southeast to the north and west. Gonzales Canyon is to the east of the subject property at a significantly lower elevation.

The subject property was undeveloped except for a rail car that appears to have been converted to a building and an abandon trailer home on the northeastern side of the subject property (Photographs 3 through 6). Neither the building nor the mobile home was occupied. The rail car was raised on stilts and had electricity running to it for an air conditioning unit and electric car charging station. A portable toilet was located between the building and the mobile home. The portable toilet located on the subject property is associated with the construction project to the north (Photograph 6).

A water storage tank and well were located on the southeastern corner of the subject property (Photograph 7). The well and pump were located in a covered and fenced structure (Photograph 8); the well did not appear to be currently in use. Surrounding the water tank and well are piles of debris including metal cabinets, PVC piping, rubber tubing, rusting pipes, and wood (Photographs 9, 10, and 11). PVC piping connected to the water tank and a spigot were located next to the building; the pipe was not buried (Photograph 12).

The subject property is provided electricity by San Diego Gas and Electric. One electrical pole located in the southeastern corner contains two transformers. The transformers appeared in good condition with no leaking or rusting (Photograph 13). Electrical lines are tied directly into a smaller electrical pole housing the meter box for the subject property (Photograph 14). Electrical lines run along the eastern boundary south to north (Photograph 15) and along the western boundary south to north (Photograph 16 and 17).

Three large shipping containers are located on the northeastern side of the subject property north of the building and mobile home. The containers were locked and appeared to be associated with the ongoing construction (Photograph 18). Several areas on the subject property were used to store construction materials and equipment (Photographs 19 through 21).

The surrounding properties include a gated community of residential homes to the south (Photograph 22), the Harvest Evangelical Church and parking lot to the west, an active construction site for a church to the north (Photograph 23), and Gonzales Canyon to the east (Photograph 24).

Summary of Observations

Wetlands and Natural Waterways

A wetland area is located on the eastern portion of the subject property and extends to the east of the subject property (Photograph 24).

Surface Water Discharge

Surface water generated from excess rainfall collects and drains to the northwest or to the east into Gonzales Canyon.

Distressed Vegetation

The seasonally dry weather conditions and recent clearing of tall grasses observed during the site reconnaissance made it difficult to discern unnaturally distressed vegetation. No distressed vegetation was observed during the site reconnaissance. However, the soil and vegetation had recently been disturbed by construction activities.

Indications of Solid Debris Storage

There are multiple areas of solid debris storage. There were piles of debris surrounding the water tank and well including metal cabinets, PVC piping, rubber tubing, rusting pipes, and wood (Photographs 9, 10, and 11). Debris likely associated with construction to the north was also observed. Several areas on the subject property were used to store construction materials and equipment (Photographs 19 through 21). (Appendix E, Photograph Log)

Chemical Storage or Use

No chemical storage areas were observed, though one car battery was observed (Photograph 25).

Unnaturally Colored Water

No unnaturally discolored pools or flowing water were observed on the subject property.

Groundwater Wells, Cisterns, Cesspools, or Septic Tanks

One groundwater well was located in the southeast corner of the subject property; it provides water for the subject property (Photographs 7 and 8).

Sumps or Ponds

No sumps or ponds were observed on the subject property.

Transformers

Two pole mounted transformers were observed in the southeastern corner of the subject property. No leaking or rusting was observed on the transformers (Photograph 13).

Abnormal Odor

No abnormal odors were noted on the subject property.

Soil Disturbances

The topsoil and tall grasses appeared to be disturbed. The subject property appears to have been recently graded and grubbed; small soil and grass debris piles were observed in the center of the parcel (Photograph 2).

Storage Tanks

No evidence of USTs was observed on the subject property during the site reconnaissance. A water storage tank was located in the southeastern corner of the subject property (Photograph 7).

Pipelines

Pieces of small-diameter PVC piping were observed near the well on the southeast portion of the subject property (Photographs 10 and 12).

Stained Soil

No signs of stained soil were observed on the subject property.

Utilities

The subject property is powered by San Diego Gas and Electric. One electrical pole located in the southeastern corner houses two transformers. The transformers appeared in good condition with no leaking or rusting (Photograph 13). Electrical lines are tied directly into a smaller electrical pole housing the meter box for the subject property (Photograph 14). Electrical lines run along the eastern boundary south to north (Photograph 15) and along the western boundary south to north (Photographs 16 and 17).

7 Historical Aerial Photographs

Dudek reviewed historical aerial photographs from EDR for 1928, 1939, 1949, 1953, 1964, 1966, 1970, 1979, 1985, 1989, 1990, 1994, 1996, 2002, 2005, 2009, 2012, and 2016 (Appendix F). The photographs provided background information to assess the possibility of past activities that could indicate environmental concerns. The aerial photographs are described in Table 1.

Table 1. Summary of Aerial Photograph Review

Date	Description	Surrounding Area Description
1928	The subject property appears to be undeveloped with a single dirt road crossing from the southeast to the northwest. There is a darker, vegetated area on the eastern portion of the subject property.	To the north of the subject property is the San Dieguito River and San Dieguito River Valley, this area appears to be divided into sections possibly for agricultural uses. To the east a low laying wetland appears along with sectioned agricultural plots. To the south appears one residence surrounded by a large cleared area, a stream flowing east to west, and row crops. To the west appears additional agricultural area. A few dirt roads transect the area.
1939	The subject property appears to be undeveloped. There is no longer a dirt road transecting the middle of the subject property. A dirt road runs along the southern boundary of the subject property.	To the west a stream appears to be draining into the lowland/wetland area, and additional row crops have been planted. To the south and west, additional row crops are observed around the stream.
1949	The subject property appears to be used for agriculture and has row crops planted.	The stream to the west is no longer there. To the south three new residences appeared and three small buildings. Agriculture is present in the surrounding areas.
1953	A residence appears in the southeastern corner of the subject property. Roadways are present along the southern and western borders. The row crops appear to be gone.	Additional row crops are seen north of the subject property. The row crops to the south appear to be cleared.
1964	Six small buildings appear to the north of the residence on the eastern portion of the subject property.	Development to the far southeast appears to have increased with additional residences, roads, and agricultural plots. Main roads to the east appear to be paved.
1966	Two small buildings remain north of the residence. Otherwise the subject property condition is similar to 1964.	The aerial image appears similar as compared to the 1964 aerial image.
1970	The aerial image appears similar as compared to the 1966 aerial image.	The aerial image appears similar as compared to the 1966 aerial image.
1979	A second residence appears to the north of the residence built in 1953.	The residences to the south of the subject property appear to have been removed. The stream to the east appears to be flowing north into a flat lowland area. A pond is present to the northwest. Development has increased in the southeast of the subject property with additional roads, and residences.

Table 1. Summary of Aerial Photograph Review

Date	Description	Surrounding Area Description
1985	A dirt road appears to transect the eastern portion of the subject property. Otherwise, the condition of the subject property is similar to 1979.	The low land area to the northeast appears to have more trees and brush. A large building surrounded by large cleared lot is present to the east. A rectangular row crop field is apparent to the north. The small pond to the northeast appears to be drying up.
1989	The subject property appears to only have one residence in the southeastern corner and a few trees. The residence in the northeast is no longer there.	El Camino Real is built and paved to the west. The surrounding area to the northwest, west, and southwest is agriculturally developed with plots of row crops. The large cleared lot to the east has an additional five buildings and one large rectangular animal agriculture barn. To the southeast of the subject property, seven long rectangular animal agricultural barns appear with outdoor paddocks, 19 small square barns, and associated large farm buildings.
1990	The condition of the subject property appears similar to the 1989 aerial photograph.	To the east of the subject property the farm appears to have expanded adding three farm plots. To the northwest, west, and southwest it appears most of the small plots have been consolidated to a few large plots for row crops. The small pond to the northwest appears to have dried and the stream to the south appears to also be drying up.
1994	The roads that bounded the subject property on the south and west appear to not be maintained anymore. Otherwise conditions on the subject property appear similar to 1990.	A large rectangular building appears to the west of southwest of the subject property. The farm to the southeast appears to have removed the large rectangular barns and square barns. Row crops appear to be delineated into smaller plots to the west and southwest of the subject property.
1996	The condition of the subject property appears similar to the 1994 aerial photograph.	The wetland area to the northeast appears to have expanded with more trees and brush.
2002	The condition of the subject property appears similar to the 1996 aerial photograph.	To the southwest a horse training facility appears to be built. To the south of the subject property 16 homes and 11 building pads associated with a new private road appear off El Camino Real. A small pond has appeared southeast of the subject property. Further south on El Camino Real an additional housing development appears to have been built. The farm east of the subject property appears to have two large parking lots built.
2005	The condition of the subject property appears similar to the 2002 aerial photograph.	To the south of the subject property, all homes appear to be built on the private road off El Camino Real.

Table 1. Summary of Aerial Photograph Review

Date	Description	Surrounding Area Description
2009	The condition of the subject property appears similar to the 2005 aerial photograph.	To the west of the subject property a church and associated parking lot appear to be being constructed. The farm plots to the west and southwest appear to have been cleared and graded.
2012	The small residence in the southeastern corner of the subject property appears to have been demolished.	To the west of the subject property the church and associated parking lot appear to be completed. Surrounding conditions are similar to 2009.
2016	At least the western half of the subject property is covered in row crops. The current building configuration has appeared, one long rectangular shaped building and one mobile home along the eastern boundary of the subject property.	The aerial image appears similar as compared to the 2012 aerial image. Row crops are also present adjacent to the subject property to the north.

Dudek reviewed available Google Earth images of the subject property from 1994 to present. The following observations were noted for the subject property. Between 1994 and early 2003, the subject property was primarily undeveloped. In March 2003 through June 2004, the subject property is graded with rows, which appear to be for agriculture; there is some vegetation on the west side in the 2003 images. In 2008, the subject property appears to be used for a horse park. There are several vehicles and a semi-truck on the eastern end of the subject property. There are three covered structures to the north and another horse park north of the structures; all of these features are razed by June 2009. In 2010, the subject property is entirely vacant. In 2012, there is a long structure on the east side of the subject property. In November 2013, the subject property has been graded in a row formation indicative of agriculture use; however, there is no vegetation. The long rectangular structure and some other items are present on the east side. The conditions are similar until December 2014, when the site is covered in vegetation. Rows of crops are present on most of the subject property and the property to the north. Irrigation lines are also visible. Conditions are similar through 2016, though in 2016 the configuration of the rows changes. The rows are visible through 2019, though it appears they may not have been actively used for agriculture after 2016. The subject property is cleared in March 2020, with the exception of some areas of equipment and/or debris near the center and the structures on the east side.

8 Historical Topographic Maps

Dudek reviewed historical topographic maps from 1903, 1930, 1943, 1953, 1967, 1975, 1994, and 2012 (Appendix G). The topographic maps are a historical source that can be used to document the prior use of the subject property and surrounding area. The topographic maps are described in Table 2.

Table 2. Summary of Topographic Map Review

Date	Scale	Description Subject Property	Description Surrounding Area
1903	1:63,360	The subject property is depicted as undeveloped with a stream flowing from Gonzales Canyon east to west along the western boundary of the subject property. The land generally slopes from east to west.	The subject property is depicted as on the southern edge of the San Dieguito River Valley, with the San Dieguito River to the north, a small stream paralleling the river to the north, and wetland to the west. Main roadways appear to transect the surrounding area with a few residences.
1930	1:63,360	The subject property is depicted as similar as compared to the 1903 topographic map.	The condition of the surrounding area appears similar to the 1903 topographic map.
1943	1:24,000	The subject property is depicted as having an unimproved road along the southern boundary. The stream that bounded the west side of the subject property has diverted off the property to the north.	The San Dieguito Valley wetlands have reduced in size and two small ponds appear to the northwest of the subject property. A few more roads appear to transect the area with several new residences. Via de la Valle is depicted as a primary highway to the north. A well spring is depicted 1 mile southeast of the subject property. To the west the Del Mar Airport is depicted.
1953	1:24,000	The condition of the subject property appears similar to the 1943 topographic map.	The topographic map appears similar as compared to the 1943 topographic map. Via de la Valle to the north is depicted as a secondary highway.
1967	1:24,000	The topographic map appears similar as compared to the 1953 topographic map. A structure is depicted on the southeast corner of the subject property. The intermittent stream previously depicted adjacent to the northeast corner of the subject property has been replaced by small areas of vegetation.	To the southeast of the subject site, more residences are depicted. Two small ponds are depicted to the west of the subject property. The Del Mar Airport to the west is no longer present. A freeway (Interstate 5) is depicted to the west. A "sewage disposal pond" is shown just west of Interstate 5. El Camino Real to the east and Via de la Valle to the north

Table 2. Summary of Topographic Map Review

Date	Scale	Description Subject Property	Description Surrounding Area
			are depicted as secondary highways.
1975	1:24,000	The condition of the subject property appears similar to the 1967 topographic map.	The condition of the surrounding area appears similar to the 1967 topographic map.
1994	1:24,000	The condition of the subject property appears similar to the 1975 topographic map.	El Camino Real is depicted as a light duty road and a portion of it has been reconstructed and now passes to the west of the subject property. Of the small ponds to the west and southwest the southernmost pond has expanded in size substantially. The road depicted as leading to the subject property from the south is no longer shown. Substantial residential development is depicted on the surrounding foothills.
2012	1:24,000	The small residence is no longer depicted in the southeastern corner of the subject property. The subject property is depicted as generally flat, sloping to the northnorthwest as in its current state.	Directly south of the subject property a private road is depicted. No buildings are depicted on the 2012 topography.

9 Site History

Based on review of the historical aerial photographs and topographic maps, agency records, and the site representative interview, the subject property was undeveloped from at least 1928 to 1943; the exact date of original site development is unknown. One small building was present on the subject property in 1943 near the southeastern corner of the subject property; it was removed in 2009. An additional building was observed in the northeastern corner between 1979 and 1985. The current building was brought to the subject property by 2012. The property was used for agriculture from at least 1949 until approximately 1953 and from 2014 to 2016.

Adjoining properties have consisted of undeveloped land, agricultural land, residential housing, and roadways. Surrounding properties have also included light commercial use. The Harvest Evangelical Church adjacent to the west has been present since 2009.

9.1 Fire Insurance Maps

Historical Sanborn fire insurance maps were requested from EDR. Sanborn maps provide information regarding the historical uses of the subject property and surrounding properties. Sanborn maps typically exist for cities with populations of 2,000 or more; the coverage is dependent on the location of the subject site within the city limits. The Sanborn Map Report lists the subject property as an unmapped property; no additional information was included in the report (Appendix H).

9.2 City Directory

City directory listings were provided by EDR for the years 1989, 1991, 1992, 1994, 1995,1999, 2000, 2004, 2006, 2009, 2014, and 2017 (Appendix I). The subject property address, 13860 El Camino Real, was unlisted in the from 1989 to 1995 and 2014 to 2017. Listings between 1999 and 2009 identify the occupant as Wesley Royal.

9.3 Previous Investigations

No information or reports regarding previous environmental investigations for the subject property were provided to Dudek.

9.4 Title Information/Environmental Liens

An environmental lien search of APN 304-650-37-00 was conducted on December 14, 2020, to satisfy the requirements of the All Appropriate Inquiries Rule for Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability. No environmental liens or activity use limitations were identified for the subject property parcels (Appendix J).

According to the Environmental Lien and Activity Use Limitation Search Report (Appendix J), the subject property APN 304-650-37-00 is currently owned by St. John Garabed Armenian Apostolic Church Trust Fund. The deed was transferred in 2017 from the previous owners, Jack N. Kalaydijan as trustee of the Jack N. and Maro J. Kalaydijan Family Trust.

10 Public Agency Records Search Review

The regulatory database search gives a listing of sites within up to a 1-mile radius of the subject property ("target property" is the term used by EDR) that are known to be chemical handlers or hazardous waste generators or that have reported releases of hazardous substances or petroleum products. Information in these listings includes the location of the site relative to the subject property, type of potential environmental concern present, and the status of the site. EDR conducted the database search for this Phase I ESA in November 2020; the report is included in Appendix B.

Table 3 summarizes the environmental databases that are required to be searched by ASTM Standard E1527-13. Additional environmental databases that provide information on hazardous materials and petroleum products on the subject property were searched. The comprehensive list of databases is included in the EDR report (Appendix B).

Table 3. Summary of Regulatory Databases Searched

Acronym	Database	Search Distance	Subject Property Listed?	Number of Sites Listed
NPL	National Priorities List (including proposed NPL sites and NPL Liens [target property only])	1 mile	No	0
Proposed NPL		1 mile	No	0
Delisted NPL	National Priority List Deletions	1 mile	No	0
CERCLIS - Federal Facility		0.5 miles	No	3
CERCLIS - SEMS	CERCLA Superfund Enterprise Management System	0.5 miles	No	0
CERCLIS NFRAP (SEMS ARCHIVE)	CERCLA Superfund Enterprise Management System Archive	0.5 miles	No	0
CORRACTS	Resource Conservation and Recovery Act (RCRA) Corrective Action	1 mile	No	0
RCRA TSDF	RCRA - Transportation, Storage, and Disposal Facilities	0.5 miles	No	0
RCRA-LQG	RCRA Large Quantity Generators	0.25 miles	No	1
RCRA-SQG	RCRA Small Quantity Generators	0.25 miles	No	4
RCRA-VSQG	RCRA Very Small Quantity Generators	0.25 miles	No	0
ERNS	Emergency Response Notification System	Target Property	No	0
LUCIS	Institutional Control/Engineering Control	0.5 miles	No	0
US ENG CONTROLS	Sites with Engineering Controls	0.5 miles	No	0
US INST CONTROLS	Sites with Institutional Controls	0.5 miles	No	0
RESPONSE	State-and Tribal-Equivalent NPL	1 mile	No	0
ENVIROSTOR	State- and Tribal-Equivalent CERCLIS	1 mile	No	3
SWF/LF	State and Tribal Landfill and/or Solid Waste Disposal Site	0.5 miles	No	0
LUST	State Leaking Underground Storage Tank	0.5 miles	No	1
Indian LUST	Tribal Leaking Underground Storage Tank	0.5 miles	No	0

Table 3. Summary of Regulatory Databases Searched

Acronym	Database	Search Distance	Subject Property Listed?	Number of Sites Listed
AST	State and Tribal Registered Aboveground Storage Tank	0.25 miles	No	2
UST	State and Tribal Registered Underground Storage Tank	0.25 miles	No	1
CPS-SLIC	Cleanup Program Sites	0.5 mile	No	0
Indian UST	Registered Underground Storage Tank on Tribal Land	0.25 miles	No	0
FEMA UST	FEMA-owned Registered Storage Tank	0.25 miles	No	0
Indian VCP	Voluntary Cleanup on Tribal Land	0.5 miles	No	0
VCP	State and Tribal Voluntary Cleanup	0.5 miles	No	0
Brownfields	State and Tribal Brownfields	0.5 miles	No	0
Additional Environmental Records, including local lists	Varies	Yes	No	1

Note: The search distances in the EDR report and listed in this table are equal to or greater than the search distances required by ASTM Standard E 1527-13.

The subject property was not listed in the regulatory databases searched by EDR. Sites within the specified search areas were identified in the EDR report; they are discussed below.

10.1 Subject Property

The subject property was not listed in the federal, state, or local regulatory databases searched by EDR.

10.2 Adjacent/Nearby Properties

Four nearby sites within the ASTM-specified search distances were identified in the EDR report; details for these sites are discussed as follows:

- School site No. 6 on Old El Camino Real, San Diego, California 92130, is 0.369 miles to the southeast of the subject property at a lower elevation. It was listed in the EnviroStor, SCH, and CERS database. This site was investigated as required of any school site that is using state funds for development or reconstruction. Former agriculture was identified as a concern for organochloride pesticide use. There may be hydrocarbons in soil in a small area surrounding a fertilizer mixer located in the middle of the property. The case status is listed as "Inactive-Withdrawn." Based on the available information, it does not appear that this site has impacted the environmental conditions of the subject property.
- Fairbanks/Highland Middle School Site Number 6 was plotted within 1 mile of the subject property; however, review of the documents available online indicates that the school is approximately 2.75 miles to the southeast of the subject property. Based on the distance and regulatory database, this site does not appear to have impacted the environmental condition of the subject property.

• Navy Dirigible, Del Mar, California, is 0.893 miles to the southwest subject property at a lower elevation. It is part of the Navy Dirigible Base 5 Ordnance Magazine Site at Del Mar, California, which is 0.898 miles to the southwest of the subject property at a lower elevation. They are both listed in the EnviroStor database. Navy Dirigible site one is classified as inactive-needs evaluation as of July 2005 and Navy Dirigible site two is listed as a UXO (unexploded ordinance) storage area. Based upon the available information, these sites are unlikely to have impacted the environmental conditions of the subject property.

10.3 Environmental Data Resources Proprietary Historical Databases

The subject property was not listed in the EDR proprietary historical databases searched.

10.4 Unmapped/Orphan Sites

Unmapped sites are flagged by EDR but not mapped due to insufficient address information. They are usually included in the database search report because they are in the same zip code as the subject property. Ten unmapped sites were identified: six in the water quality permit database, CIWQS; one in the NPDES database; and one in the San Diego Co. HMMD database.

- All six of the CIWQS (California Integrated Water Quality System) listings were for stormwater construction
 along El Camino Real. Based on the distances and regulatory database, these do not appear to have
 impacted the environmental condition of the subject property.
- Of the two Recovered Government Archives leaking USTs, the first one, Shell El Camino Real, is located approximately 18 miles north of the subject property and the second site, El Camino Rental, is approximately 17 miles north of the subject property. Based on the distances and regulatory database, these do not appear to have impacted the environmental condition of the subject property.
- El Camino Real widening is listed in the NPDES database as a construction permit to widen the El Camino Real. Based on the distances and regulatory database, these do not appear to have impacted the environmental condition of the subject property.
- Leslie Farms Inc is listed as located at El Camino Real and Der, San Diego, California 92130, and is listed in the HMMD San Diego (Hazardous Materials Management Division Database). Based on the distances and regulatory database, these do not appear to have impacted the environmental condition of the subject property.

INTENTIONALLY LEFT BLANK

11 Vapor Encroachment Screening

A vapor encroachment screen report was prepared using EDR's vapor encroachment worksheet (Appendix K). A "Tier I" vapor encroachment screening was performed for the subject property, in accordance with ASTM E 2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions, to evaluate whether there is a potential for vapors originating from contaminated soil and/or groundwater to occur in the subsurface below the existing and potential future structures.

Dudek reviewed a list of sites identified in federal, state, and local databases as they relate to the subject property. Information obtained from other sources (historical reports, geologic and hydrogeological information, site reconnaissance, interviews, local regulatory agency responses), as discussed in this report, were also considered. Based on the information reviewed, there are no reports of volatile organic compound contamination in soil or groundwater adjacent to, or on, the subject property that could impact the environmental condition of the subject property. As such, a vapor encroachment condition was not identified.

Based on this screening, a vapor encroachment condition does not exist for the subject property (Appendix K).

INTENTIONALLY LEFT BLANK

12 Potential Hazards and Environmental Concerns

Information regarding potential sources of hazards and hazardous material releases from the interview, site reconnaissance, and review of regulatory agency records is as follows.

Agricultural Use

Based on a review of historical aerial photographs and Google Earth images, the subject property was used as agricultural land from at least 1949 until approximately 1953 and 2014 to 2016. While pesticides of concern may have been used during the earlier period of agriculture use, given the limited time the agriculture was present, that it has been approximately 70 years since the earlier agriculture use, and that the subject property has been graded, it is unlikely that residual pesticides of concern, if present, would be above regulatory screening levels.

Off-Site Sources

Based on the review of regulatory agency records, it is unlikely that off-site sources have impacted the environmental conditions of the subject property.

Residential Use

Based on a review of historical aerial photographs, topographic maps, google earth imagery, and the background questionnaire, the subject property has been used for residential purposes since at least 1939. The original residence appeared to have been removed in 2009, but the exact demolition and removal date is unknown. Based on the site reconnaissance, the historical structures have been removed. The current building was brought on the subject property in 2012. The mobile home appears to have been brought on to the property in 2018, but the exact date is unknown. The ages of these structures are unknown. If hazardous building materials (e.g., asbestos containing materials, lead based paint) are present in either structure, they would need to be disposed of in accordance with applicable state and local requirements.

Polychlorinated Biphenyl Items

Two transformers or other equipment that could contain polychlorinated biphenyls were observed on the subject property. No rust, staining, or leaking was observed from the transformers.

Fill Material

No fill material was observed on the subject property during the site reconnaissance.

Debris

Multiple debris piles consisting of wood and metal scraps were observed on the subject property.

Chemical Use

One car battery was observed on the subject property during the site reconnaissance. No other chemicals were observed during the site reconnaissance. Information provided in the background questionnaire indicated that there was no significant chemical use on the subject property.

Tanks

One water tank was observed, which is supplied by the on-site water well. Information provided in the background questionnaire stated it was unknown if a septic tank or cesspool was on the subject property.

Radon

The EDR report presents radon test results for the vicinity of the subject property. In all, 32 sites within zip code 92019 were evaluated. The radon concentration at each of the 32 sites was less than 4 Pico curies per liter, which is the federal action level for radon. The federal Environmental Protection Agency Radon Zone for San Diego County is 3, which corresponds with indoor average radon levels of less than 2 Pico curies per liter.

Wetlands

Dudek consulted the U.S. Fish and Wildlife Service National Wetlands Inventory online mapper (USFWS 2020). On the subject property eastern boundary and directly adjacent to the east of the subject property is a Freshwater Forested/Shrub Wetland (Classification code Palustrine, Scrub-Shrub, Temporarily Flooded); the U.S. Fish and Wildlife Service classified the 3.84-acre wetland as a Palustrine environment that is non tidal and dominated by trees and shrubs.

13 Findings and Conclusions

A Phase I ESA was conducted for the subject property. The subject property consists of approximately 3.97 acres of land situated on APN 304-650-37-00 (Figure 1). The subject property is primarily undeveloped and currently occupied by a former rail car, a mobile home, and three shipping containers. The former rail car is located on the eastern border of the subject property, the mobile home is just north of the rail car, and the shipping containers are north of the mobile home on the eastern border.

The findings of this investigation are based on a review of historical source information, a search of regulatory agency databases, review of available local agency records, interviews, and a site reconnaissance.

Information gathered for this report indicated the following:

- The subject property appears undeveloped from at least 1928 to 1943; the exact date of original site development is unknown. One small building was present on the subject property in 1943, in the southeastern corner; it was removed in 2009. An additional building was observed in the northeastern corner from 1979 to 1985. The current building was brought to the subject property by 2012. Based on an aerial review on Google Earth (Google Earth 2020), the mobile home that is currently on the subject property was brought there in 2018. The ages of these structures currently on the subject property are unknown. If hazardous building materials (e.g., asbestos containing materials, lead based paint) are present in either structure, they would need to be disposed of in accordance with applicable state and local requirements.
- The subject property was used as a residence from approximately 1943 to 2009. A horse park was present on most of the subject property in 2008.
- The subject property was used for agriculture from at least 1949 until approximately 1953 and from 2014 to 2016. Organochlorine pesticides may have been used during the earlier period of agriculture use; however, given the limited time the agriculture was present, that it has been approximately 70 years since then, and that the subject property has been graded, it is unlikely that residual organochlorine pesticides, if present, would be above regulatory screening levels. Adjoining properties have consisted of undeveloped land, agricultural land, residential housing, and roadways. Surrounding properties have also included light commercial use.
- Based on the documents reviewed, site inspection, and visual observation of neighboring properties from the subject property and public right-of-way, it is unlikely that adjacent or nearby properties have impacted the environmental conditions at the subject property.

Dudek performed this Phase I ESA of the subject property in conformance with the scope and limitations of ASTM Practice E1527-13. This report summarizes the research and findings of the Phase I ESA. This assessment revealed no evidence of RECs in connection with the subject property. This assessment revealed no evidence of historical RECs or controlled RECs in connection with the subject property. Dudek did not identify any vapor encroachment conditions in connection with the subject property.

Dudek identified the following items of potential concern:

 The wetland on the eastern portion of the subject property is registered with the U.S. Fish and Wildlife Service National Wetland Inventory. Appropriate permits would need to be obtained prior to any development of the subject property.

INTENTIONALLY LEFT BLANK

14 Limitations

Dudek identified the following data gaps:

Dudek was not able to access the interior of the building or mobile home.

Based on current and historical information obtained and reviewed for the subject property, Dudek has determined this data gap is less than significant.

The findings and conclusions presented in this report are professional opinions based solely on the indicated data described in this report, visual observations of the subject property and vicinity, and our interpretation of the available historical information and documents reviewed. Dudek makes no warranty as to the accuracy of statements made by others or the accuracy of information included in documentation reviewed in connection with this study. This study was not intended to be a definitive investigation of potential contamination at the subject property, and the recommendations do not necessarily include all conditions that may be present. Because the scope of the investigation was limited, it is possible that currently unrecognized conditions or contamination might exist at the subject property.

No warranties or guarantees or representations, expressed or implied, are made by Dudek, except that this report has been prepared in accordance with current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professionals performing the same or similar services. The conclusions are intended exclusively for the purpose outlined herein and may not be suitable to satisfy the needs of other users. Thus, any use or reuse of this document is at the sole risk of said user.

In accordance with ASTM Standard E 1527-13, this Phase I ESA is valid for 180 days. After 180 days, this report, or the information presented in this report, must be updated in accordance with the ASTM Standard.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

13860 EL CAMINO REAL SAN DIEGO, CA 92130

COORDINATES

Latitude (North): 32.9705320 - 32° 58' 13.91" Longitude (West): 117.2377390 - 117° 14' 15.86"

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/27/2020 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SCHOOL SITE NO. 6 Facility Id: 37010013 Status: Inactive - Withdrawn	OLD EL CAMINO REAL	SE 1/4 - 1/2 (0.369 mi.)	1	9

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

Data Coverage

DEL MAR YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: LAS FLORES

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Map ID: 2

Soil Component Name: CORRALITOS

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to

excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

	Boundary		Boundary		Classification		
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	hydraulic conductivity micro m/sec

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Location(s): 13860 El Camino Real, San Diego, California 92130 and APN: 304-650-

37-00

Dear Requestor:

On December 11, 2020 the Department of Toxic Substances Control (DTSC) received your email of December 11, 2020 requesting records under the Public Records Act. After a thorough review of our files, no site records were found pertaining to the address 13860 El Camino Real, San Diego, California 92130.

In order to perform a search of our records, we need a street address. We are not able to search for records using an APN as our databases do not contain that information. However, we will search the county database that issued the APN to determine the street address which will allow us to search our records.

Please provide the county name for the APNs listed in your request. Since counties use different formats, usable results will depend on the accuracy and format of the APN provided.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSCs data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at (619) 516-1982 or via email at sandiegofileroom@dtsc.ca.gov.

Sincerely,

Beatriz Davila

Meatry Carela

Regional Records Coordinator

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Dudek & Associates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1903 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Environmental Lien and Activity Use Limitation Report

The NETR Environmental Lien and AUL Search Report

13860 EL CAMINO REAL SAN DIEGO, CALIFORNIA

Monday, December 14, 2020

Project Number: L20-01277

2055 East Rio Salado Parkway Tempe, Arizona 85281

Telephone: 480-967-6752 Fax: 480-966-9422

ENVIRONMENTAL LIEN AND AUL REPORT

The NETR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied property information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' office, registries of deed, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved and description); and
- provide a copy of the deed or cite documents reviewed;

Thank you for your business

Please contact NETR at 480-967-6752 with any questions or comments
